CAREER OBJECTIVES

To be the best Java | Kotlin programmer and tutor in Nigeria. Developing great business and control Android mobile and cross-platform desktop solutions.

ABOUT

I am a software developer whose interest and practice lies in cross-platform desktop solution development and android mobile solution development. I find purpose in developing an interactive desktop/android solutions that makes monitoring/control of an electrical system easy and seamless via customized developed embedded system. Outside control, I like to develop custom and business desktop/android solutions. I prefer programming with Java and Kotlin because both languages are JVM type, 100% interoperable with one another and are both powerful languages in Android and desktop solution development. I have my first degree in Electrical/Electronic Engineering (EEE) and aspires to have a master degree in computer science. Am not just a code geek, I do solar and electrical installations of various capacities for residential and commercial consumers.
